**COMPREHENSIVE LIST OF GLOBAL COVID TESTING LOCATIONS – DRAFT
DOCUMENT**

Action Required:

Members are invited to review the draft spreadsheet attached at Annex 1 and to see whether there are any testing locations which they know of in their country or which they have used elsewhere which have not yet been included.

Where this is the case **please send details annotated in the spreadsheet annotated in red to natalie.shaw@ics-shipping.org** and these will be added in to the master document.

The aim is:

- for the list to be updated on a regular basis and also for locations to be eliminated if concerns are expressed with regard to the reliability or safety of the tests that have been processed at the respective establishments.
- to post the first mature document up on the ICS website with available information on 13th October 2020.
- to update the document on the website with any changes or information provided by countries or companies weekly from then onwards.
- to also note any concerns expressed regarding the testing facilities and where necessary to take them off the list.
- to add references to the list to any future versions of the ICS Covid 19 - Medical Guidance issued after 13th October 2020 to assist companies seeking such information.
- For any companies wishing to share additional testing information with the network to contact the undersigned at the above email address.

ICS would also be happy to share the name of the information source if desired or alternatively to exclude if preferred.

It is recognised that the advice on testing and availability of tests is constantly changing so ICS will need the assistance of others to advise when changes are known to be able to maintain the document as a valuable tool for the industry.
